

2022 California Almond Acreage Report

Pacific Region · 650 Capitol Mall, Suite 6-100 · Sacramento, CA 95814 · (916) 738-6600 · (855) 270-2722 Fax · www.nass.usda.gov/ca

Released: April 27, 2023

RESULTS

California's 2022 almond acreage is estimated at 1,630,000 acres, 1.2% lower than the 2021 acreage of 1,650,000. Of the total acreage for 2022, 1,350,000 acres were bearing, 2.3% above 2021, and 280,000 acres were non-bearing, down 15.2% from 2021. Preliminary bearing acreage for 2023 is estimated at 1,380,000 acres.

ALMOND BEARING AND NON-BEARING ACREAGE ¹

Year	Bearing	Non-bearing	Total
2019	1,180,000	340,000	1,520,000
2020	1,250,000	350,000	1,600,000
2021	1,320,000	330,000	1,650,000
2022	1,350,000	280,000	1,630,000
2023 ²	1,380,000	(NA)	(NA)

¹ Reported data with an allowance for incompleteness.

² Preliminary estimate of bearing acres.

(NA) Not available.

Nonpareil continued to be the leading variety based on bearing acreage, followed by Monterey, Independence, Butte, and Carmel.

Fresno, Kern, Stanislaus, Merced and Madera were the leading counties. These five counties accounted for 75% of the total bearing acreage.

OBJECTIVES

The Pacific Regional Office of the USDA's National Agricultural Statistics Service (NASS) conducts an annual acreage survey of California almond growers. The purpose of this survey is to provide annual almond acreage information on new plantings and removals. It is a continuation of a long series of industry funded almond acreage surveys.

This report consists of two parts:

- Estimated almond acreage -- bearing, non-bearing, and total.
- Detailed data by variety, year planted, and county -- as voluntarily reported by almond growers and maintained in the NASS database.

With perfect information, the estimated almond acreage and the detailed data would be the same. However, differences exist for the following reasons:

- A voluntary survey of nearly 6,500 almond growers is unlikely to attain 100 percent completeness.
- It is difficult for USDA, NASS to detect growers that are planting almonds for the first time.

The detailed data reflects tree removals from nearly 35,000 acres during the past twelve months. Of this number, a significant amount of acreage was harvested in 2022 prior to being pushed out, and that acreage has already been removed from the detailed data.

PROCEDURES

The major source of the almond detailed data was a questionnaire mailed to all almond growers from our list of almond orchards. The mailing was sent in October 2022. The questionnaire contained previously reported crop, variety, and acreage information preprinted. Producers were asked to update the information with new plantings, removals, and any other corrections. New growers were mailed a blank questionnaire. Growers were given time to respond by mail. Telephone follow-up was then undertaken. Data collection ended in April 2023.

To arrive at the estimated almond acreage, NASS considered information provided by the County Agricultural Commissioners and LandIQ, as well as data collected on the Almond Nursery Sales Report.

ACKNOWLEDGMENTS

The USDA, NASS, Pacific Regional Office sincerely appreciates the many farm operators, owners, and management firms that provided their information. A special thanks is due to the Almond Board of California for funding.

¹ Final estimates of production, price and value will be available in the annual Noncitrus Fruits & Nuts publication, released on May 8, 2023.

² Production and yield were revised based on the Almond Board of California's most recent crop receipts, published in the March 2023 Position Report.

³ Production will be available in the 2023 Almond Forecast Report, released May 12, 2023.

⁴ Preliminary estimate of bearing acres.

(NA) Not available.
